PROFESSIONAL SUMMARY

Data Analyst with hands-on internship experience in Python (Pandas), SQL, Power BI (DAX), and Domo. Skilled in data cleaning, transformation, analysis, and visualization, with practical experience building dashboards and HR analytics solutions for business use cases. Also exposed to AI-assisted data applications, using them to make data easier to explore and understand.

TECHNICAL SKILLS

Programming & Data Analysis: Python, Pandas
Database: SQL
BI & Visualization: Power BI, DAX, Domo, Plotly
Domo: Domo Connectors, Magic ETL, Cards
AI & Data Applications: Generative AI, Large Language Models (LLMs), AI Agents, RAG / Vector Store

PROFESSIONAL EXPERIENCE

Data Analyst Intern | GWC.Data.AI — July 2026 – October 2026

- Worked on data analysis, automation, and visualization using Python, Pandas, SQL, Power BI, DAX, and Domo.
- Performed data cleaning, transformation, and analysis to prepare datasets for practical business use cases.
- Developed dashboards and analytical solutions to present meaningful insights.
- Used Domo Connectors, Magic ETL, and Cards for data integration, transformation, and visualization.
- Completed hands-on Domo certification/exploration activities.

PROJECTS

HR Analysis Automation & Visualization | *Python, Pandas, Streamlit, Data Analysis, Visualization*

- Developed an HR analytics application using Python and Pandas for employee data analysis, with automated HR report generation, attrition-risk alerts, interactive visualizations, and CSV export.
- Implemented role-based access control with user management, department-based access, and audit logging.
- Built an interactive HR AI assistant that handles HR-related queries and generates visualizations.

Medical Agent AI | *Python, Pandas, Streamlit, AI/LLM, Plotly, RAG / Vector Store*

- Developed an AI-powered application for patient data analysis, loading and validating CSV/Excel datasets with Pandas and building an interactive dashboard with KPIs (Total Patients, Average Age, Glucose, BMI, Heart Rate).
- Added filters (Age Range, Gender, Blood Group, Medical Condition), Plotly visualizations of patient conditions and health metrics, patient-level analysis, and AI-generated non-diagnostic health summaries.
- Implemented a conversational assistant for dataset questions and PDF report upload, with documents split into knowledge chunks in a vector store for AI-assisted retrieval.

AeroVista Dashboard | *Power BI, DAX, Data Modeling, Data Visualization*

- Developed an interactive Power BI dashboard with KPI cards and business-focused visualizations, applying data modeling concepts.
- Used DAX for calculated measures and KPIs, with slicers, filters, and drill-down for interactive analysis of business metrics.

Digital Marketing Dashboard | *Domo, Domo Connectors, Magic ETL, Cards, Data Visualization*

- Built a Digital Marketing Dashboard in Domo following the workflow: Data Integration → Data Transformation → Visualization → Dashboard.
- Used Domo Connectors to bring in data, Magic ETL to transform it, and Cards to analyze marketing metrics and trends.

CERTIFICATIONS & ACHIEVEMENTS

Generative AI: Introduction and Applications — IBM via Coursera — April 2026
22 Google Cloud Generative AI Skill Badges — Naan Mudhalvan

- Areas include Generative AI, LLMs, Responsible AI, MLOps, Vertex AI Studio, Transformer Models, Attention Mechanism, Image Generation, Vector Search, and Prompt Design.

Domo Hands-on Certification / Exploration — Domo Connectors, Magic ETL, Cards

EDUCATION

Bachelor of Computer Applications (BCA) — 2026
Adhiyaman Arts & Science College for Women, Salem (Affiliated to Periyar University, Salem) | Aggregate: 79%
HSC — National Matriculation Higher Secondary School — 2023
SSLC — National Matriculation School — 2021
